Do Thi Thao

Frontend Developer

Dob: 17/01/2000
Phone: 0868 128 559
Email: thaobean1701@gmail.com
Address: Dong Da, Ha Noi
Portfolio: https://thaodo.tech

PROFESSIONAL SUMMARY

Frontend Developer with **3.5+ years** of production experience building scalable, real-time web and mobile applications. Proficient in **ReactJS, Next.js, and TypeScript**, with hands-on expertise in **WebSocket-driven systems** and automated testing (**Jest, Cypress**). Experienced working across diverse domains, including **aviation, omnichannel commerce, and mobile** — delivering features in Agile teams with international clients. Complemented by **1 year of full-stack exposure with NestJS** and practical experience **integrating OpenAI APIs** into customer-facing products, applying AI-assisted development workflows to accelerate delivery.

EDUCATION

09/2018 - 09/2022 **University of Transport and Communications**
B.Sc. Information Technology
Technology GPA: 3.72 / 4.0

PROFESSIONAL EXPERIENCE

01/2025 - Present **MTT Software**
Centamess - Full-Stack Developer
Centamess — An omnichannel customer care platform centralizing real-time interactions from Facebook, Telegram, Instagram, LINE, and a proprietary live chat widget into a single inbox, with integrated order management and carrier support.

- Built an omnichannel customer care platform supporting real-time messaging across Telegram, Facebook, Instagram, and LINE using WebSocket for low-latency communication.
- Integrated OpenAI API with a custom knowledge base to build a domain-specific chatbot, automating responses to common customer inquiries.
- Standardized a reusable component system (20+ components) by customizing shadcn/ui with ReactJS and Tailwind CSS, ensuring consistent UI patterns across modules.
- Designed and implemented bi-directional message routing with NestJS — receiving inbound messages from Facebook, Telegram, Instagram, and LINE via webhooks, persisting to the database, and broadcasting to the frontend in real-time via WebSocket; outbound replies from agents are routed back to the originating platform.
- Built a NestJS service to capture Facebook Livestream comments in real-time and automatically classify purchase-intent messages for order processing.
- Developed a data migration pipeline from Sapo, importing warehouse inventory, customer records, products, and orders into the platform's database.
- Integrated carrier methods (Viettel POST, GHN) for order fulfillment support.
- Built a multi-tenant embeddable live chat widget as a self-contained JavaScript bundle — each registered merchant receives a unique ID to inject the widget into their website, routing visitor messages directly into the Centamess inbox alongside Facebook, LINE, and Telegram conversations.

- Participated in sprint planning and code reviews within an Agile/Scrum team.
- **Tech Stack:** ReactJS · Next.js · TypeScript · Tailwind CSS · shadcn/ui · NestJS · WebSocket · React Query · RESTful API · MongoDB · PostgreSQL · Prisma

08/2024 - 12/2024

MTT Software x Outlier AI *(Contract)*

Prompt & JavaScript Engineer

- Designed JavaScript prompts to evaluate model capabilities across edge cases and language patterns.
- Assessed model outputs against Outlier's quality rubric — rating responses for accuracy, conciseness, and clarity.
- Provided corrected responses as ground truth data to improve model behavior through human feedback loops.
- **Tech Stack:** JavaScript · Prompt Engineering · RLHF

04/2024 - 08/2024

MTT Software x Mission Digitalisierung GmbH *(Outsource)*

Prowo - Frontend Developer

Prowo — A department and employee task management application.

- Built a Kanban-style task board with drag-and-drop support using @hello-pangea/dnd — supporting card reordering within columns, cross-column card movement, and column reordering.
- Integrated RESTful APIs to fetch board data and update task status in real-time upon drag-and-drop interactions.
- Implemented an in-app file preview feature supporting multiple formats (PDF, TXT, images) without leaving the application.
- Developed unit tests to ensure component reliability and code quality.
- **Tech Stack:** ReactJS · TypeScript · @hello-pangea/dnd · RESTful API · Jest

01/2023 - 03/2024

MTT Software x Mission Digitalisierung GmbH *(Outsource)*

WebATUS / Indra Avitech — Frontend Developer

WebATUS / Indra Avitech — A large-scale flight schedule management and real-time status tracking system for an international aviation client.

- Developed frontend modules for flight schedule management and real-time status updates within a large-scale modular React application, serving an international aviation client.
- Integrated WebSocket communication for live flight status syncing, ensuring system reliability under high-frequency data updates.
- Migrated the entire application from Ant Design v4 to v5, adapting all custom styles and themes from the Less variable system to the new CSS-in-JS Design Token architecture, ensuring UI consistency across the application.
- Wrote and maintained automated test suites with Jest (unit) and Cypress (E2E), improving system reliability and reducing regression bugs.
- Update the version of major libraries to keep the newest technology.
- **Tech Stack:** ReactJS · TypeScript · Ant Design · Redux Toolkit · WebSocket · RESTful API · Jest · Cypress

06/2022 - 12/2022

MTT Software x Connecta *(Outsource)*

House of Barbaard (Mobile Booking App) — Frontend Developer

House of Barbaard — A React Native mobile booking app for grooming services.

- Developed and maintained a React Native mobile booking app for grooming services, improving UX stability and performance.
- Integrated RESTful APIs and handled data synchronization with backend services.
- Implemented new features and resolved bugs based on client requirements in a fast-paced outsourcing environment.
- **Tech Stack:** React Native · NativeBase· RESTful API

TECHNICAL SKILLS

Frontend	ReactJS · Next.js · React Native · TypeScript · JavaScript (ES6+)
Styling	Tailwind CSS · shadcn/ui · Ant Design · MUI · NativeBase
State & Data	Redux Toolkit · React Query · Zustand
Backend	Node.js · NestJS · WebSocket · RESTful API
Database	PostgreSQL · MongoDB · Prisma
Testing	Jest (Unit) · Cypress (E2E)
AI Tools	ChatGPT · Claude · Trae — used to enhance productivity & code quality

CERTIFICATE

TOEIC 600
